EXPERIENCE

STEM Instructor

Tech Academy in Overland Park, Kansas

Summer 2025

- Taught technology-focused classes, including programming, LEGO robotics, and digital media, to students ages 5–14.
- Led classes of up to 22 students, balancing active instruction with guided independent exploration.
- Prepared and delivered engaging lessons based on requirements for learning to encourage hands-on learning and problem-solving.
- Managed classroom equipment, ensuring proper setup, organization, and maintenance throughout the program.
- Collaborated with site managers and fellow instructors to create a safe, structured, and energetic learning environment.

Goodwill Ecommerce Photographer

2024

- Set up and maintained a professional-grade studio photography setup.
- Utilized three-point lighting techniques to capture high-quality product shots and still-life photographs.
- Demonstrated expertise in editing software, enhancing images to achieve desired aesthetics, and meeting corporate expectations.

Head Mentor – FTC Robotics

Team 17218, Brookline Bots in Brookline, MA

2025 - Present

- Mentored an all-girls STEM robotics team in Java programming, robot design, build, and competition strategy.
- Guided students through the full engineering design process, from brainstorming to competition readiness.
- Fostered technical growth and leadership skills, helping team members develop expertise in coding, mechanical design, and problem-solving.
- Supported the team in regional and global competitions, ensuring readiness in both technical performance and teamwork.

Leader of Programming, Website, Media, and PR

Robotics team at Lee's Summit North High School

2020 - 2024

- Led Java programming efforts for four years, achieving globally recognized autonomous performance, ranking in the top 50 worldwide in 2022 and 2023.
- Rebuilt the team's website from a 2012 legacy version to a modern, responsive design featuring advanced functionality such as API integrations and dynamic content updates.
- Founded and managed the media team, mentoring newcomers and ensuring consistent recognition for high-quality promotional materials.
- Directed public relations initiatives, crafting media campaigns that strengthened the team's brand and outreach.
- Hosted 3 summer camps annually for kids in 1st to 6th grades, leading in groups, media, and programming.

Cyber Security - Cyberpatriots Team Lead

2018 - 2024

- Advanced to the State Finals every year, securing Nationals appearances twice and achieving "Best in Class" rankings in four of seven years.
- Spearheaded the Linux section, leading configurations, security hardening, and scripting, while mentoring teammates on Windows OS optimization.
- Developed and implemented scripts that consistently set the benchmark for "Best in Class" performance across multiple years.
- Soloed a traditionally six-person team during the 2020 season due to COVID-19 challenges, earning recognition as the Best in Missouri and placing in the national top 35 in 2020.
- Fostered a collaborative and results-driven team culture, guiding members to improve technical competencies and critical problem-solving skills.

Tournament Judge Program Manager

Lee's Summit North High School, Speech and Debate

2020 - 2024

- Managed judge assignments and logistics for Speech and Debate tournaments, ensuring seamless operations over four years.
- Designed and deployed a web-based database system to track judge assignments, prevent duplication, and facilitate accessibility for all users.
- Integrated advanced features into the database, including round-specific and event-based email/text notifications for judges, error detection mechanisms, and student signup tracking.
- Developed tools to generate postcards, automate communication, and streamline tournament workflows, improving overall efficiency.
- Enabled the district's only tournaments in 2023 and 2024 to finish ahead of schedule, a rare accomplishment in a region with frequent delays.
